Warranty/Service

Mr. Pig Enterprises, LLC, warrants the Mr. Pig XL Air Roaster Kit for one year from the Date of Purchase. This is only valid for parts and workmanship. This warranty does not cover things such as rust, misuse by the operator, using any of the Mr. Pig XL Air Roaster Kit in a manner not intended, or any other use by a purchaser that results in damage to any part of the kit, injury to any user, damage to any property, or any use that could be considered dangerous and not in line with the instructions.

The Mr. Pig XL Air Roaster Kit consists of four parts: Mr. Pig Massive Fire Reflector, Mr. Pig Ultimate A Frame, Mr. Pig Roto Box and the Mr. Pig Meat Basket.

We at Mr. Pig Enterprises, LLC have made every attempt to explain what to expect when using the Mr. Pig XL Air Roaster Kit. Being impossible to anticipate every scenario involving all users, Mr. Pig Enterprises, LLC, is not responsible for any damage or injury caused by a user of the Mr. Pig XL Air Roaster Kit. The user of the Mr. Pig XL Air Roaster Kit agrees to hold harmless Mr. Pig Enterprises, LLC from any litigation that may arise from using the Mr. Pig XL Air Roaster Kit.

Mr. Pig Massive Fire Reflector

The Mr. Pig Massive Fire Reflector consists of 5 panels. These panels are constructed with 3/4 X 1/8" angle iron steel and corrugated roofing tin. These panels are assembled without the need for additional tools. **CAUTION:** Assembly of the Mr. Pig Fire Reflector has the risk of finger pinch. The panels fit tightly together when assembled. A finger can easily be pinched. Always wear gloves when handling the panels of the Mr. Pig Massive Fire Reflector. Also, the legs on the back of each panel could possibly fold down unexpectedly and cause minor injury. See the Mr. Pig Massive Fire Reflector Instruction Sheet for Detailed Assembly Instructions. This is an outdoor, open air, style of cooking. There will be a spot of burned ground where the reflector is standing. **CAUTION:** The steel in contact with the fire will be extremely hot during the cooking process. If you are purchasing the Mr. Pig XL Air Roaster Kit for use at home, it is recommended to leave the Fire Reflector set up in a permanent location. Once you have cooked a pig, there will be a bed of coals left in the Fire Reflector. **CAUTION:** Some people might think that pouring water on the bed of coals is a good way to extinguish the bed of coals. While this will indeed work, you will be left with a big muddy mess of black coals and water.

There are a couple of options to deal with a big bed of coals. 1. As recommended above, leave the Fire Reflector in a permanent location. Just leave the bed of coals to extinguish itself over a 3 – 5 days. Once

the coals have extinguished themselves, there will be a smaller pile of ashes that is easily removed. 2. Cover the bed of coals with dirt. This will allow the bed of coals to extinguish itself a day or so faster. Once the fire is extinguished, the dirt and ashes can be removed. A Flat Blade shovel is a good tool for ash pick up.

If you are cooking a pig at a remote location where you need to take the fire reflector with you after cooking, you will need to carefully move the panels away from the bed of coals. The fire reflector will lay out flat while it is still connected. Move the side panels out and lay the reflector on top of the bed of coals. Pull the reflector off the bed of coals, being careful not to spread to many coals out. The fire reflector can then be separated into its individual pieces, loaded up and hauled away. The bed of coals will still need to be covered with dirt to keep the coals protected from wind, rain, people, animals, etc. Anyone or anything that could possibly contact the bed of coals should be protected against any possibility of burn injury.

Mr. Pig Ultimate A Frame

The Mr. Pig Ultimate A Frame is designed to help facilitate the cooking only. Any use other than cooking is not recommended. The A Frame is constructed with square, steel tubing. Every piece of tubing is designed to store and transport easily. **CAUTION:** The Legs and top bar are designed to slip inside of each other. This creates a finger pinch risk. Use Gloves when setting up or taking down the Ultimate A Frame. If you have purchased the Mr. Pig XL Air Roaster Kit for home use, it is ok to leave the Ultimate A Frame assembled. See the Mr. Pig XL Air Roaster Kit Assembly Instructions for details on assembly of the Mr. Pig Ultimate A Frame. Mr. Pig Enterprises, LLC is not responsible for any injury or damage that may result from the use or misuse of the Mr. Pig Ultimate A Frame. We strive to provide a product that will offer a long term of service under normal conditions.

Mr. Pig Roto Box

The Mr. Pig Roto Box comes complete and is not designed to be serviced in any way. **CAUTION:** The Mr. Pig Roto Box is used in conjunction with all other parts of the Mr. Pig XL Air Roaster Kit. Any use outside of its intended use is at the risk of the user. Mr. Pig Enterprises, LLC is not liable for any injury or property damage from the use of the Mr. Pig Roto Box. See the Mr. Pig XL Air Roaster Kit Assembly instructions for how to set up your roto box properly to cook your pig.

Mr. Pig Mega Meat Basket

The Mr. Pig Mega Meat Basket is easy to use and has no additional assembly. **CAUTION:** The Mr. Pig Mega Meat Basket should be handled with care. Use sanitary gloves when handling pork. Be careful not to contact sharp wire while sandwiching the meat between the two sections of cooking wire. **CAUTION:** Be sure to fasten both sides of the meat basket, so the meat to be cooked will not shift during the cooking process. **CAUTION: DO NOT CUT THE WIRE THAT MAKES UP THE BOTTOM PIECE OF THE MEAT BASKET. Cut only the tie wired sandwiching the meat between the two pieces of cooking wire.**
